PROFESSIONAL SUMMARY

I am a multi-skilled IT professional with hands-on experience in IT support, software development, and data analysis. Proven track record of solving technician issues, developing user-friendly applications, and interpreting data to guide strategic decisions. Skilled in troubleshooting hardware/software problems, writing clean code in Python and Java, and creating dashboards in Power BI. Known for clear communication, adaptability, and drive for continuous improvement.

Experience

IT CONSULTANT, UNIVERSITY OF THE WITWATERSRAND

OCT 2024 - PRESENT

- Improved MySQL performance by reducing query execution time by 35%.
- Contributed to building an attendance register app (Python, Java, PowerApps) that boosted student attendance by 80%.
- Automated 10+ manual processes with Python and Java, cutting analysis time by 74%.
- Built an ETL pipeline to transfer and process 200GB of data into a warehouse using SQL Server and Excel.
- Developed an automated attendance tracking system with 60+ Power BI/Excel reports and dashboards, enhancing academic staff insights.
- Delivered reusable, tested code across multiple client projects.

IT SUPPORT TECHNICIAN, NORTH-WEST UNIVERSITY

JULY 2023 – SEPT 2024

- Conducting regular testing of AV equipment.
- Set up Teams/Zoom meetings and configuration of video conferencing systems.
- Monitored system performance and security, proactively addressing vulnerabilities and threats.
- Assisted in the deployment and maintenance of network infrastructure.
- Provided technical support via phone, email, and in-person, achieving a high percentage of customer satisfaction rate.
